Invitation to Participate

THE WORLD WE WANT 2015 THEMATIC CONSULTATION ON WATER

The Millennium Development Goals (MDGs) – which have shaped the global development agenda for over a decade – are set to expire in 2015. Important progress has been made in many areas including water and sanitation, but what should come next?

To answer this question, the UN is hosting an online global consultation along 11 different themes, seeking to activate the diverse voices of civil society, young people, NGOs, business, academia and professional groups.

Water is one of those global themes. Your voice can shape the future!

FACILITATED BY UN-WATER **CO-LED BY** UNDESA AND UNICEF
CO-HOSTED BY NETHERLANDS, SWITZERLAND AND LIBERIA

Be part of creating solutions

We know that water and sanitation are essential for human well-being, economic development and a healthy environment. We know that developments in the Water Resources Management, Wastewater & Water Quality, Water, Sanitation and Hygiene (WASH) sectors are saving lives and the environment. But we still have much to do.

Input from civil society, youth groups and NGOs are vital components in this process of planning for our shared future. Your involvement can directly influence which water related recommendations are submitted to the UN secretary General and the High Level Panel team for consideration in the 2015 development agenda.

Activate your right to shape the future and tell them what you want YOUR world to look like.

Contribute to shaping the post-2015 development agenda by joining the conversation;
