

# One UN for Sustainable Consumption and Production (SCP): Joint Action to Implement the 10YFP

**Date:** 30 June 2014, 13:15 – 14:30 New York | **Location:** Conference Room ECOSOC

At Rio+20 world leaders reaffirmed that promoting sustainable consumption and production (SCP) is one of the three overarching objectives of, and essential requirements for sustainable development. As a response they adopted the 10 Year Framework of Programmes on Sustainable Consumption and Production Patterns (10YFP). The 10YFP is a global framework for action to enhance international cooperation and accelerate the shift towards sustainable consumption and production (SCP) patterns in both developed and developing countries.

As part of this effort, the 10YFP Inter-Agency Coordination Group (IACG) - which gathers 19 UN bodies - was established in May 2013. This group promotes cooperation and coordination within the UN system for the implementation of the 10YFP. The main objectives and expected outcomes of the group are:

- Coordinated, effective and substantive contribution of the UN system, respecting existing mandates and programmes of work, to fulfill the objectives, goals and functions of the 10YFP;
- Enhanced information sharing and coordination among UN bodies to support governments and other stakeholders' efforts on shifting to SCP patterns;
- Greater visibility of the 10YFP as a key Rio+20 implementation mechanism.

This side event is organized by the IACG with the support of the 10YFP Secretariat. It will bring together UNDESA, UNEP, UNESCO, FAO and UNESCAP, in a panel discussion dedicated to the role of the UN in building cooperation, joint capacity building activities on SCP and implementing the 10YFP.
