**Introduction:**

The 2030 Agenda for Sustainable Development not only emphasizes the role of governments and all stakeholders for its implementation but it also highlights the need for a “**robust, voluntary, effective, participatory, transparent and integrated follow up and review framework**” as a vital element for the realization of its ambition.

Governments must be accountable to their citizens, setting up appropriate systems for follow up and review of the commitments set up at the 2030 Agenda, supporting international cooperation and fostering the exchange of good practices and mutual learning.

This is the 3<sup>rd</sup> “**Implementation Series Webinar**” promoted by Together 2030 and this event will be co-hosted by the [TAP Network](#). The webinar will focus on the next steps towards the establishment of a coherent, efficient and inclusive follow up and review system at all levels with a specific focus on the global level.

***Join this webinar for a discussion about how the follow up and review systems are being set up at the global, regional and national levels to monitor the implementation of the 2030 Agenda for Sustainable Development***
