# Inclusion of Monitoring

## Tracking, Engagement, Performance Improvements

Raymond Saner & Lichia Yiu

# Our Concern

❖ **There are important** <u>gaps</u> **in the "Critical Milestones toward Coherent, Efficient and Inclusive Follow-Up and Review at the Global Level" (SG Report, 1/2016)**

❖ **Reviews should not become top-down big-data expert driven instead we suggest to balance SDGs implementation with bottom up monitoring by a country's citizens and communities**

❖ **Institution are key actors in service delivery and oversight.  HLPF thematic reviews of SDG 16.6, SDG 16.7 and SDG 17.9 must be scheduled in 2016 not in 2019!!.**

# What are these Primary SDG Targets?

SDG 16: Promote just, peaceful and inclusive societies

16.6 Develop **effective**, **accountable** and **transparent** **institutions** at all levels

16.7 Ensure **responsive**, **inclusive**, **participatory** and **representative** **decision-making** at all levels

# What are the Primary SDG Targets?

**SDG 17: Revitalize the global partnership for sustainable development**

**Capacity Building**

**Target 17.9** Enhance **international support** for implementing **effective** & **targeted** capacity building…to support **national plans** (**Partnership** Agreement) including through North-South, S-S and triangular cooperation

# What are these Primary SDG Targets?

**Target 17.18** (2020) increase significantly the availability of high-quality, timely and reliable data disaggregated by income, gender, age, race, ethnicity, migratory status, disability, geographic location and other characteristics relevant in national contexts

**Target 17.19** (2030) to develop measurements of progress on sustainable development that complement gross domestic product, and support statistical capacity-building in developing countries

# Monitoring

- **Is part of the *due diligence* for the people, by the people and of the people**
- **Needs to be structured for regular review and analysis**
- **Must support local learning and innovation**

**Is NOT something nice to do! But MUST do now!**

# Next Steps

- **Agreeing on a common <span style="color:red">monitoring framework</span> to ensure process predictability (rules, policy and procedures)**

- **Setting up a <span style="color:red">governance mechanism</span> to ensure the quality, compatibility, inclusiveness and steady flow of data**

- **Co-investing in a <span style="color:red">global monitoring infrastructure</span> including regional data hubs to pool all structured or unstructured data for public access and meta analysis**

- **<span style="color:red">Linking existing databases</span> to support SDG review <span style="color:red">at all levels</span>**
